

Credit should be given when credit is due. St. Andrew's Episcopal Church in New Berlin, NY has been fortunate to have been fortunate to have Statewide Roofing maintaining our slate roof for over twenty years. When we began this association they promised their firm care of our facilities slate roof. Our structure was built in 1846 and is on the National Historical Registry. It is an impressive building and the roof has been cared for in an excellent manner. They have lived up to their promise of quality craftsmanship at an affordable cost.

We are most appreciative of the care their worker's have shown to our church. They have always been respectful and thorough in maintaining the appearance of St. Andrew's. Because of their work we have a beautiful, sound slate roof. And because of their quality work I have recommended them to other churches.

We appreciate and acknowledge their excellent work. Thank you, Statewide! Please feel free to contact us at anytime or come and see the quality work they have provided for us.
